Jquery-shake

Shakes the element, horizontally.

Usage

- include jQuery:
```
<script src="http://code.jquery.com/jquery-
1.11.0.min.js"></script>
```

- add js:
```
<script src="./jquery.shake.js"></script>
```

Shake

call the plugin, with js
$.shake():
- $("#element").shake();

Options:

- **direction** (default:"left")
Type: String
A value of "left" or "right" will shake the element horizontally

- **vibration** (default: 6)
Type: integer
Number of oscillations

- **amplitude** (default: 50)
Type: integer
Value of the first deviation

- **timeFirstDeviation** (default: 240)
Type: integer
Time of the first deviation

Example:
Shake a input

```
<!doctype html>
<html lang="en">
<head>
    <meta charset="utf-8">
     <title>shake demo</title>
     <style>
     #Demo {
         width: 100px;
         height: 20px;
         background: #111;
     }
     </style>
    <script src="http://code.jquery.com/jquery-
```

```
1.11.0.min.js"></script>
   <script src="./jquery.shake.js"></script>
</head>
<body>
        <input id="Demo">
<script>
$(document).click(function(){
           $("#Demo").shake();
        });
</script>
</body>

</html>
```
